SOFT SKILL DEVELOPMENT WORKSHOP

INTRODUCTION –

While hard skills teach us what to do, soft skills tell us how to apply our hard skills in a social environment. The focus of the course is to develop a wide variety of soft skills starting from communication, to working in different environments, developing emotional sensitivity, learning creative and critical decision making, developing awareness of how to work with and negotiate with people and to resolve stress and conflict in ourselves and others.

The uniqueness of the course lies in how a wide range of relevant issues are raised, relevant skills discussed and tips for integration provided in order to make us effective in workplace and social environments. The key areas addressed are conversation skills, group skills, persuasion skills, presentation skills, critical and creative thinking, emotional skills, positive thinking and vocational skills. Soft skills training is important because it can help you develop your career and can create a positive work environment for you and your colleagues. Soft skills training teaches you how to achieve and maintain a positive and professional attitude. You may learn how to build relationships with coworkers and customers, which promotes cooperation and communication within the workplace and trust among colleagues, clients and customers. Soft skills training also provides you with opportunities for career advancement.
